Description of the CSP Awards Database:

Starting with SY 2006-07, the Department of Education (the Department) has annually collected subgrant award information for Schools Program (CSP) grantees, including State Educational Agencies (SEAs) and Non-SEA grantees that report to the Department, and began collecting subrecipient award information from charter management organizations (CMOs). For information for each active CSP subgrant, the Department oversees the distribution of the CSP Data Collection System. The information provide the name and contact information for the charter school (or charter developer, if different than the charter management organization), the date of each subgrant; and other information, such as the name of the school's authorizer and whether the school is a public or private educational agency (LEA). The Department has taken measures to verify the information provided by the grantee. The information in the CSP Awards Database is based on grantee self-reporting.

The CSP Awards Database in this Excel file combines the data on CSP subgrant awards provided to schools that received a CSP subgrant award beginning with SY 2006-07. The CSP grants that were active in SY 2006-07 included subgrant awards that go on to fund schools. CSP grants that closed prior to SY 2006-07 are not included in this database. As a result, this database does not include schools that received a CSP subgrant award.

A subset of the variables collected by the Department is included in the CSP Awards Database in this Excel file. These variables include National Center for Education Statistics (NCES) School ID, name, and State. Schools (or prospective schools) that plan to open in the future generally do not have NCES IDs. Names for a small number of schools were not available.

The CSP subgrants are used for two primary purposes: (1) planning, program design, and initial implementation; and (2) dissemination of information, including best practices. The total award amount for each school across all years of award collection for the first purpose from the SEA and Non-SEA competitions are included in the variables named "SEA_Award_Amount" and "NonSEA_Award_Amount", respectively. The total award amount for the dissemination of information for each school across all years of award collection from the SEA and non-SEA competitions are included in the variables named "SEA_Dissem_Award_Amount" and "NonSEA_Dissem_Award_Amount", respectively. The total award from the CMO competitions (which are for successful charter schools) is included in the variable named "CMO_Award_Amount". Finally, the total for both SEA competitions and the CMO competitions is included in the variable named "Total_Award".

Codebook:

Variable Name	Variable Description
NCES_ID	National Center for Education Statistics (NCES) School ID
School_Name	School Name
State	State
SEA_Award_Amount	Award amount for planning, program design, and initial implementation from the SEA competition
SEA_Dissem_Award_Amount	Award amount for dissemination activities from the SEA competition
NonSEA_Award_Amount	Award amount for planning, program design, and initial implementation from the Non-SEA competition
NonSEA_Dissem_Award_Amount	Award amount for dissemination activities from the Non-SEA competition
CMO_Award_Amount	Award amount from the CMO competitions
Total_Award	Total award amount from all competitions
